

BenQ treVolo

LET YOUR MUSIC TAKE FLIGHT

New from BenQ, a world leader in multimedia technology – the treVolo electrostatic Bluetooth speaker.

Sound has never travelled so well.

Now discriminating listeners can finally hear their favorite vocal and acoustic music the way it was meant to be heard, wherever they happen to be. treVolo is the world's first portable Bluetooth speaker with electrostatic technology, enabling astonishing clarity and absolute precision on the fly.

Electrostatic technology, formerly only available in high-end listening room speakers, delivers superior sound quality that transports every note cleanly and crisply. Better yet, its elegant Euro design with collapsible wings and bi-directional sound adds a touch of class wherever you go with your treVolo.

Nothing else compares.

LOVE AT FIRST SOUND (AND SIGHT)

EXTRAORDINARY VOCAL CLARITY

treVolo's electrostatic panel technology delivers precise vocals and harmonies the way they are meant to be heard.

EXPRESSIVE BASS

Quad-amplified design with a precision-matched woofer/radiator system for crisp, tight bass.

EDGY, EVERYWHERE DESIGN

treVolo's sleek metallic housing and unique foldable wings let you easily take your music anywhere in style.

SOUND MODES

PURE (GREEN INDICATOR LED)

Tuned for an accurate tonal balance with minimal equalization. The Pure mode allows all of the natural detail and clarity of the electrostatic panels to come through. The best choice for audio enthusiasts and for most recordings.

WARM (RED INDICATOR LED)

A softer sound with a little more emphasis on bass and a little less on treble. The tonal balance is more like that of an ordinary Bluetooth speaker. The Warm mode can make harsh-sounding recordings nicer to listen to.

VIVID (BLUE INDICATOR LED)

Subtly emphasizes lead instruments such as vocals, guitars, horns and strings. Brings out more detail in vocal harmonies, massed strings and complex multitracked recordings.

SPECIFICATIONS

INPUT CONNECTIONS

Bluetooth 4.1 with aptX support up to 30 feet
Micro USB Digital Audio connections
3.5mm analog connection
Analog line out for audio pass through

BATTERY

Rechargeable battery with up to 12 hours of continuous play
LED battery status indicator – blue/green/red

SPEAKERPHONE

Integrated noise-canceling microphone enables you to sound crystal clear on your phone

COLORS

Black and Silver
Anodized aluminum casing with black mesh electrostatic panels

DIMENSIONS AND WEIGHT

6.9 x 5.3 x 3.1 inches (Closed)
2.6 lbs
