

Pristine and Stunning Visual Clarity

See What We See with VA Panel Technology

Panels matter. They determine the image quality, clarity, color performance, brightness, viewing angles – as well as many other important aspects of a computer monitor. Manufactured by AUO Optronics, a world-leading TFT-LCD manufacturer in the design, R&D and manufacturing of TFT-LCD panels, Vertical Alignment (VA) panels outperform conventional panels with four major advantages:

5000:1 Ultra High Native Contrast

There are two types of contrast ratio: “native”, which is what the panel itself can do, and “dynamic”, which is the contrast performance based on the signal source and backlight technology. Contrary to conventional panels, which only come with a 1000:1 native contrast ratio, VA panels boast an ultra-high native contrast ratio of 5000:1, bringing out every hue from the brightest whites to the deepest black with greater subtlety and clarity. Every image is a refreshing joy to behold on VA panels.

True Blacks and Minimized Light Leakage

Known for minimized light leakage and naturally deeper blacks, VA panels bring out flawlessly layered and contrasted details in the most complex images by keeping the backlight from passing through.

178°/178° Wide-Viewing Angles

You can enjoy truly authentic colors and ultra sharp details from left, right, above and below with a wide-viewing angle of 178°/178°. Viewing, as you know it, will never be the same.

*All comparison tests were conducted at BenQ's standard testing environment.

True 8-bit Color Performance

An 8-bit VA panel delivers smoother and more stable color transitions by rendering a total of 16.7 million color shades simultaneously. A 6-bit panel with Advanced Frame Rate Control (ARFC) requires interpolation to display the same number of colors as a true 8-bit panel does.

GW Series

Features

- Full HD 1920 x 1080 Resolution
- 5,000:1 Native Contrast Ratio
- 20M:1 High Dynamic Contrast Ratio
- 4ms GTG, Wide Viewing Angle
- Senseye® Technology
- True 8-bit Panel
- Built-in Speakers
- HDMI Multimedia Interface
- Deep Blacks and Minimized Light Leakage

Specifications	GW2250	GW2450HM	GW2750HM
