

BenQ QPresenter App for iPhone® & iPad®

A World of Knowledge at Your Fingertips

More and more schools are recognizing the benefits of teaching with Apple iPads – with teachers responding positively on how the devices have helped them succeed tremendously in engaging their students in class. The education applications open a gateway to a world of knowledge through a wide range of contents such as e-books, websites, newspapers, magazines, movies, music and games – offering students a more captivating learning experience in every subject. Teachers can be empowered to teach freely in class by using a projector, such as BenQ's LX60ST and LW61ST that comes with iPad and/or iPhone wireless display support, to expand on-screen content to over 80 inches using a wireless dongle.

Hands-on with BenQ's LX60ST and Optional Wireless Dongle

1. Download the free app QPresenter on the Apple App Store. QPresenter supports document, web and picture presentation on hosted applications. It opens PDF, PPT or JPG files.

iPad

iPhone

2. Plug BenQ's wireless dongle into the USB Type A input on the projector. This will help connect your Apple iPad or iPhone to the projector.
3. Open QPresenter to begin displaying images and files. See, it's that easy!
