BenQ GL950AM LED Monitor

An Advance in Layered Design

The GL50 series draws on a breakthrough design. Viewed from the front, the GL950AM offers a cleanly sculpted countenance, while its backplate uses boldly terraced contours, effectively reducing any impression of bulkiness. The housing's sleek lines work in counterpoint to the crisply shaped oval base stand, creating a deft balance between contrasting visual elements—and conveying an incisive sense of rich layering.

LED Leads the Way

LED backlighting offers significant advantages over the CCFL technology used in older LCD monitors. These advantages encompass not only performance metrics such as higher dynamic contrast, no light leakage and flicker-free, but also environmental factors, mercury-free and power saving 14.3%.

Senseye® Technology

Experience the truest colors of the world with the BenQ Senseye® Human Vision Technology. With the help of its six proprietary calibration techniques, Senseye® 3 delivers only the best viewing quality in each of its six pre-set viewing modes—Standard, Movie, Game, Photo, sRGB, and Eco—with the Eco Mode especially designed to save power and money.

12M:1 Ultra High Dynamic Contrast for Depth and Definition

The GL950AM comes with an ultra-high dynamic contrast ratio of 12,000,000:1 to add color depth and definition to darkened and complex visuals, so that everything you see—from the brightest white to the darkest black—is perfectly rendered to deliver the most incredible picture performance.
