BenQ Digital Camera C1460

25mm Wide-angle Lens

The C1460's 25mm wide-angle lens lets you preserve memorable scenes like a magnificent waterfront view or a crowded group portrait in photos with an expanded view.

Face Beautifier

The magical Skin Soften and De-blemish features deftly smoothly away facial imperfections, while maintaining a natural appearance, so the people in your photos look their best.

5cm Super Macro

Take shots from as close as five centimeters away, for incredible detail and an intimate feel with subjects like a dew-speckled blossom or an intricately textured tapestry.

Smile Detection

Whether a shot is carefully staged, or you want to capture a spontaneous moment, this amazing feature automatically detects the instant your subject smiles and captures a perfect shot.

High-definition Movies

Shoot brilliantly crisp high-definition 720p video at 30 frames per second for fluid movement even in fast-action movies of events like a hotly contested game of pickup basketball.

Panorama PanCapture

The C1460 helps you take breathtaking panoramic shots without separate image editing software. Just follow the visual guides to take three adjacent shots that are then auto-stitched.
