

BenQ LED Monitor GW2255

Designed to Please Your Eyes

BenQ has taken the lead to build a full lineup of VA LED monitors for home and office – starting with the GW Series! Featuring ground-breaking VA LED visual sophistication, these brand new models faithfully bring out every hue from the brightest whites to the deepest blacks with astonishing contrast. They are aesthetically pleasing in design as they are in performance – bringing harmony and balance to your contemporary décor with perfectly layered visual elements complementing their boldly sculptured countenance and a front bezel textured to sooth your eyes.

VA LED Deep Blacks and Minimized Light Leakage

Enjoy the flawless layering and precisely contrasted details in even the darkest images! Free of bright spots with low light leakage, VA panels are designed to deliver naturally deeper blacks with optimum contrast performance.

3,000:1 Native Contrast Ratio for Color Depth and Definition

Featuring a native contrast ratio of 3000:1, the GW2255 adds incredible color depth and definition to darkened and complex visuals. Everything you see – from the brightest white to the deepest black – is perfectly rendered to bring images to life.

True 8-bit Panel

8-bit VA panels give you brighter and more saturated images with faithfully recreated subtle, natural details – 16.7M color shades with interpolated 24-bit true color.

Windows® 8 compatible

The GW2255 is fully compatible with Windows 8 systems. Plug in the GW2255 to your computer, and Windows 8 will recognize it instantly, making setup and connection effortless.

Senseye® Technology

With the help of its six proprietary calibration techniques, Senseye® 3 delivers only the best viewing quality in each of its pre-set viewing modes – Standard, Movie, Game, Photo, sRGB, and Eco – with the Eco Mode especially designed to save power and money.
