Enjoyment Matters

Zoom in, Everyone's in

The S1420's 26 mm wide-angle lens gives you the expanded field of view needed for big group shots that don't leave anyone or any detail out, while powerful 5x optical zoom makes it possible to get great photos of even subjects far off in the distance.

Put Some Smarts on Your Side

Variety is the spice of your life, but that means getting a photo record of it could be a real challenge without the S1420. With the S1420, you can take advantage of automatic scene detection that chooses the right settings for each shot for you.

Picture-perfect with BenQ HDR II

BenQ HDR II is a magical feature that lets you get great high-contrast shots such as at dawn or sunset—now for 14-megapixel images. “Paint” a photograph the way you saw the scene, with all the details in both dark and bright areas intact. BenQ HDR II even lets you preview what an HDR II-enhanced photo will look like, taking the guesswork out of even the most challenging shots.

Discover Your Inner Artist

The S1420 gives you some delightful special effects that take the fun of photography to a whole new level. Besides pure fun, the LOMO, FISHEYE, and COLOR ACCENT also let you give your shots a unique personal touch.

Nighttime Is the Right Time

An ISO 6400 exposure index ensures that the S1420's highly sensitive sensor can take realistic-looking, detailed photos of a girls' night out like a crazy scene on the dance floor or a quite moment in a cozy lounge bar despite the low light.
