GAMING IS IN THE DETAILS

Built for Competitive PC & Console Gaming

"I require precise timing. The RL's combination of low input lag and 1ms response time give me the ability to execute complex moves under pressure."

— Justin "JWong" Wong, North America's Most Popular Fighting Game Player

RL2460HT Unlock the Power, Unleash the Battle

The RL2460HT is the best monitor for competitive PC and console gaming! A new gaming feature, named Fighting Mode, highlights characters queues and special animations. To eliminate input lag while streaming, an HDMI output was added directly to the monitor. The RL2460HT delivers total victory and gameplay satisfaction!

HDMI Output for Uncompromised Streaming

The built-in HDMI output allows gamers to record and stream their gameplay after it goes through the monitor instead of before, allowing their audience to see what they have seen without the risk of input lag or delay.

- The HDMI Output feature only supports an HDMI input source.
- This feature is for screen mirroring only. Extended display is not supported.

Fighting Mode to Sharpen Your Focus

BenQ invited fighting game legend, Justin "JWong" Wong of Evil Geniuses, to co-design the Fighting Mode. Through this feature, gamers can access specific color calibration settings that help them highlight the characters in combat.

Duo Smart Setup: Height Adjustment Stand & Precision Scale System

The new Height Adjustment Stand now features a precision scale system that allows gamers to effortlessly keep track of their preferences and duplicate the same precise monitor height setup each and every time.

Display Pilot for On-Screen Display Navigation

The newly upgraded Display Pilot function allows users to make all the on-screen display adjustments, plus provides them with direct access to the Game Mode Loader feature for downloading and installing the preset display settings of their favorite game or professional gamer's screen instantly.

Fast 1ms GTG Response Time

Fast response time of 1ms GTG means speed without the smear for an enhanced gaming experience. Fast-moving action and dramatic transitions will be rendered smoothly without the annoying effects of smearing or ghosting.

Windows® 8/8.1 Compatible for Versatility

The RL2460HT has passed Windows® 8/8.1 certification and is fully compatible with Windows 8/8.1 color systems.

Product Name	RL2460HT
Display	
Product Color	Black
Backlight Unit/ Panel Type	LED
LCD Size/ Aspect Ratio	24"W/ 16:9
Resolution (max.)	1920x1080
Display Area(mm)	531.36x298.89
Pixel Pitch (mm)	0.276
Brightness (typ.)	250 cd/m ²
Contrast (typ.)	1000:1
Dynamic Contrast Ratio (typ.)	12M:1
Viewing Angle (L/R;U/D) (CR>=10)	170/ 160
Vertical Refresh Rate	60Hz
Response Time(T _r +T _f) typ.	1ms GTG
