Enjoyment Matters

BenQ Digital Camera GH650

26x unlimited fun and enjoyment

The GH650 has what it takes to put the fun back into photography. Enjoy powerful 26x zoom that lets you take great photos even at great distances, a 16-megapixel CCD sensor, spacious 3" LCD screen, f/22.3-equivalent wide-angle lens, optical image stabilization, and 1cm super macro for amazing closeups.

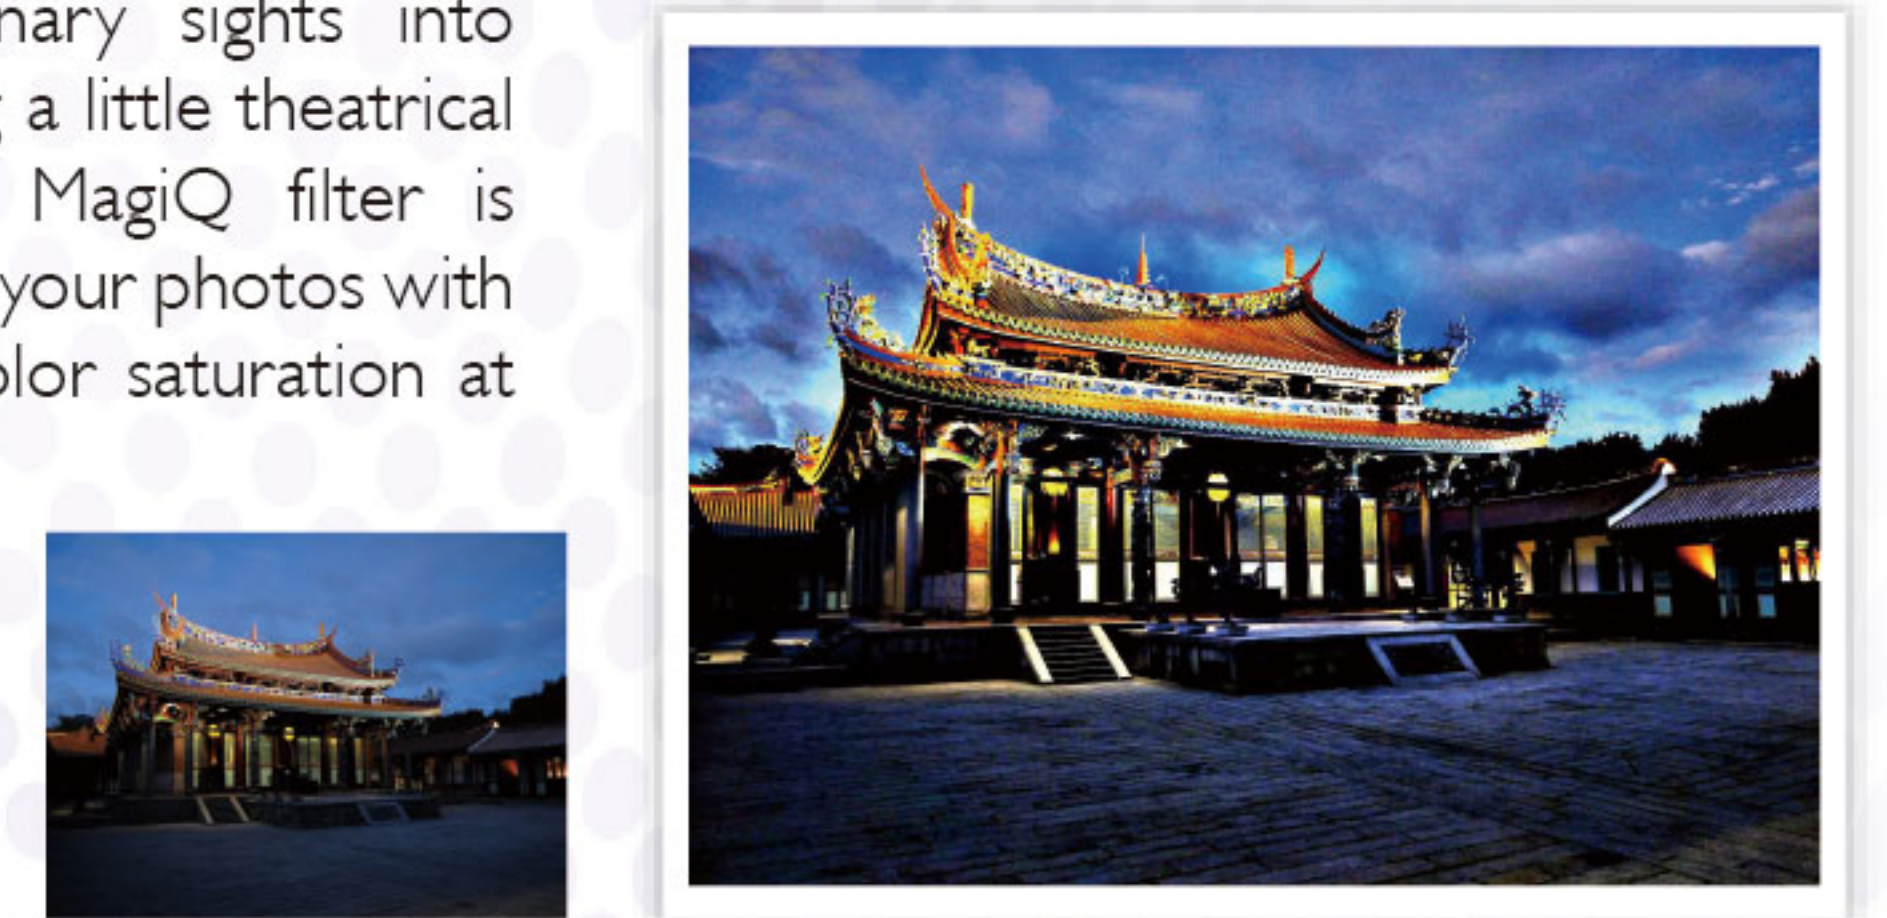

Work a little Mirror magic

A nifty effect lets you create a mirror image of one half of the frame in the other half. Create photos of someone with their double, landscapes with their reflections, and many more amazing shots.

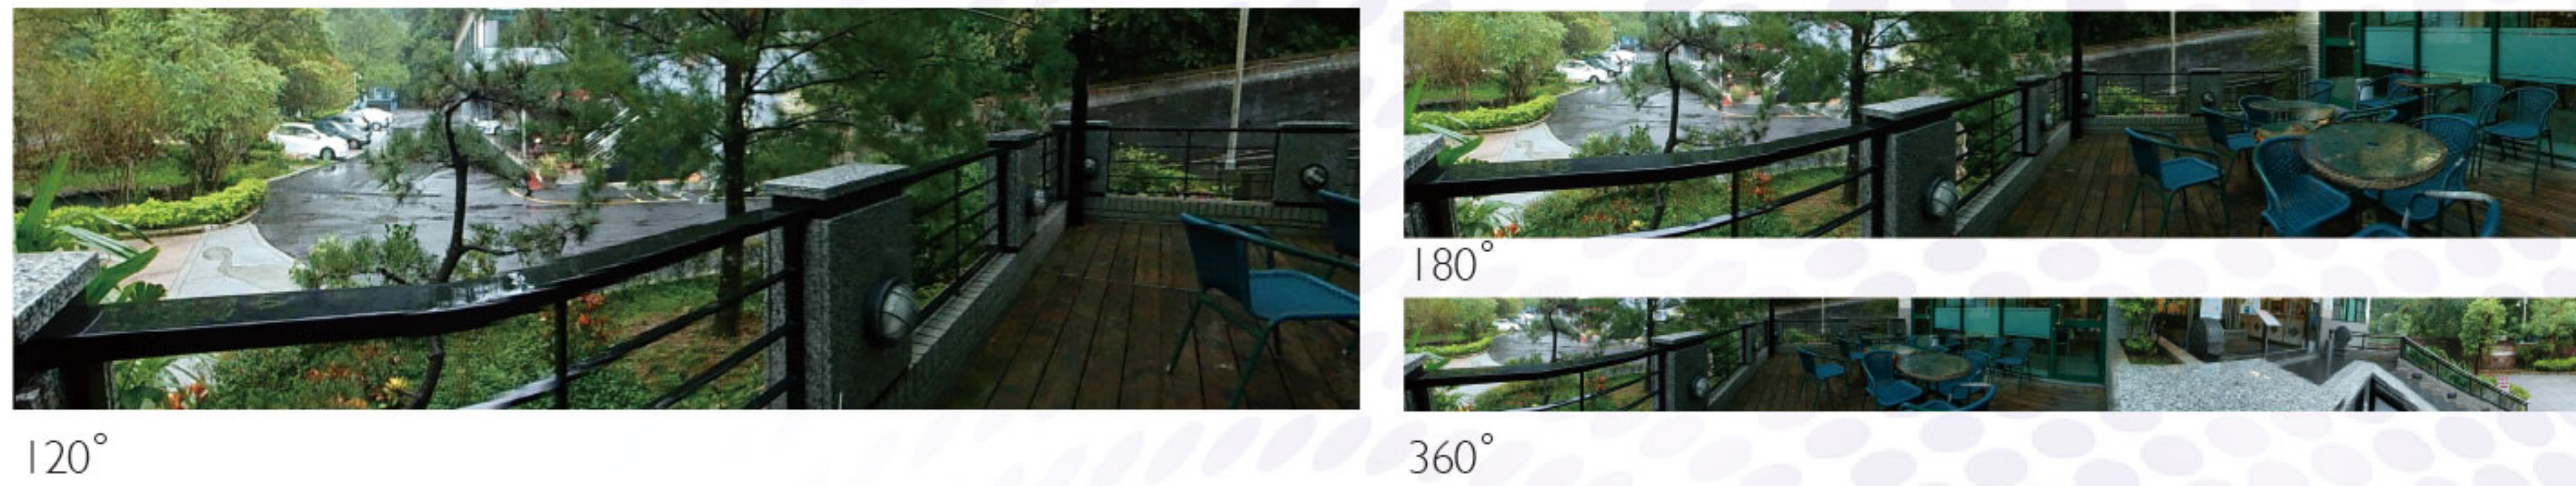

Add a little theatrical magic to your life with MagiQ filter

Transform the most ordinary sights into magnificent views by adding a little theatrical magic! BenQ's very own MagiQ filter is designed to add intensity to your photos with heightened contrast and color saturation at the moment you press down the shutter. When it's MagiQ filter, there's no such thing as an ordinary.

Put it in a Panorama

Capture all of a magnificent scene in one stunning photo. Panorama mode guides you through the process, letting you pan horizontally or vertically through 120, 180 or a full 360 degrees, then automatically combines multiple shots into one grand image.

Zoom in while HD recording

Shoot brilliantly crisp high-definition 720p movies at 30 frames per second for fluid movement. You can zoom in and out while recording to get the full story, as well as pause and resume whenever you want without creating a new video file. To start shooting, press the independent recording button next to the LCD screen.

Put it all at your fingertips

With the handy mode dial, it's easy to switch among exposure and scene modes, panorama mode, continuous shooting, and other frequently accessed features. Just a flick of a finger and you're good to go.

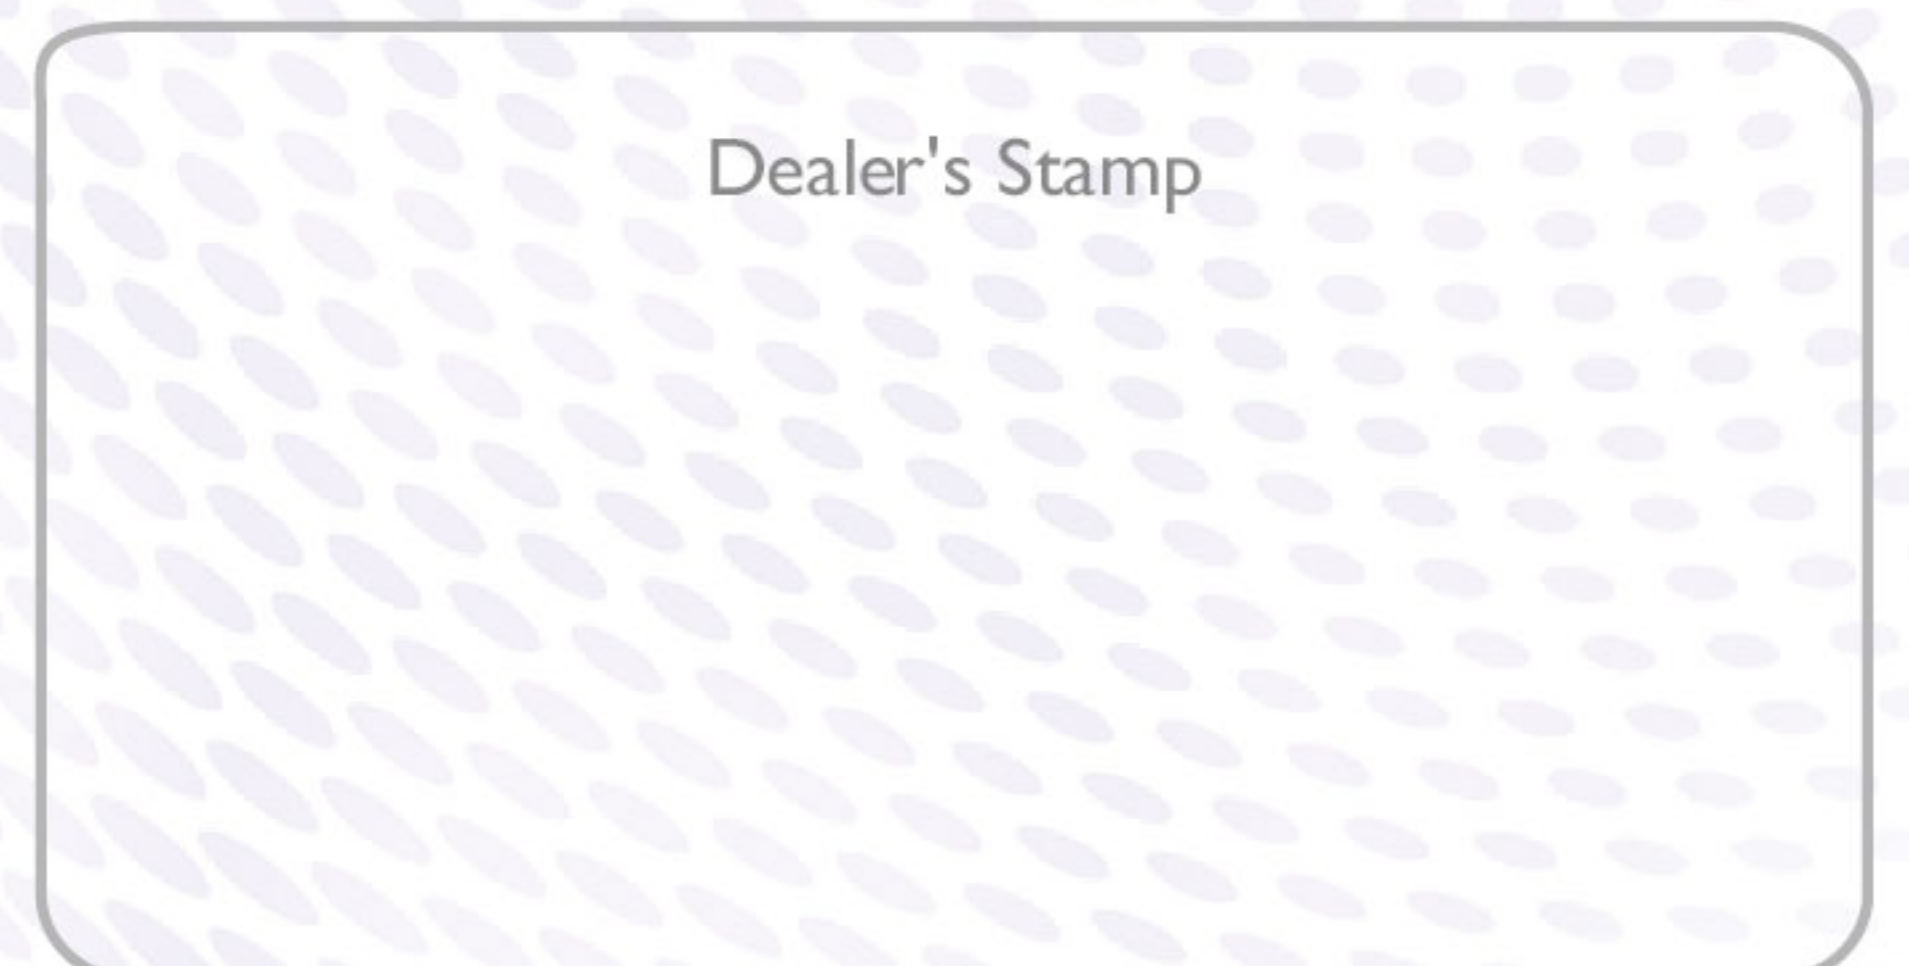

Everything you need for everyday photography

- Love portrait
- HDR
- 4 Lomo effects
- Fisheye effect
- Toy mode
- ISO 6400
