# Conquer Your Game

Gaming on the top level requires skills, expertise and determination. Recognizing this, BenQ invites world-renowned professional gamers to design monitors that can compete on a high-stance gaming level. With the success of the XL Series among FPS gamers, BenQ takes gaming monitors to the next degree with the enhanced and improved XL2420T. In addition, BenQ's new line, the RL Series, broadens the appeal for RTS gamers and the GL Series, creating effortless convenience in console gaming.

BenQ has carefully listened to what gamers want, down to the very meticulous details. When a split second could cost you the game, every single detail matters to ensure a successful victory. The XL, RL, and GL Series are true testaments to the belief that gaming is in the details, delivering the form and functions gamers need to gain a competitive edge. The monitors carry exceptional features that have been co-developed by well-known pro gamers. Each series has been created for a specific gaming purpose to give you total control and accuracy – making every gaming success more enjoyable and compelling.

## The Secret Keys to Winning

Step up to the challenge and come out as a winning champion with these exclusive features found on the XL, RL, and GL Series to help you see, play and execute your tactics better.

### Black eQualizer

The Black eQualizer gives gamers a high level of visibility. Via exclusive color engine technology, dark scenes are brightened without over-exposing the bright areas so details won't be lost, allowing gamers to easily spot their enemies in critical combat.

without Black eQualizer

with Black eQualizer

### Smart Scaling

Take advantage of the Smart Scaling button and enjoy the flexibility to freely adjust the screen content to any custom size. You can use Smart Scaling alongside the Display Mode to get the best possible view for any application or game.

### Display Mode

Choose from several different monitor sizes readily. The Display Mode hotkey allows you to interchange instantly between different screen formats. With just one monitor, you can simulate any game play and practice under different display sizes for tournaments.

### Instant Mode

The built-in Instant Mode means lower input lag that synchronizes your mouse motion to the monitor. See your opponents the moment they flinch and track their every move accurately.

### 2ms GTG

Fast response time of 2ms GTG means fast-moving action and dramatic transitions will be rendered smoothly – without smearing or ghosting. Control your gaming destiny and not leave it in the hands of slow display.

### 12M:1 Dynamic Contrast Ratio

The gaming monitors have a high contrast ratio of 12M:1 to display vibrant images with in-depth definition for optimum viewing pleasure.

### Height Adjustment Stand

Effortlessly adjust the monitor height and angle to your sight level. The monitor can be turned vertically or horizontally and comes with a quick-release VESA mount design.

### LED Backlight Monitor

Superb contrast ratio, brightness and details are achieved on our energy-efficient LED backlight monitor. The entire screen produces constant illumination for vibrant colors.

### Intuitive UI

The all-new OSD design enables you to conveniently change your settings in an intuitive horizontal slide out menu display. The side buttons correspond to specific functions and layers to allow you to easily navigate between options and settings. Quickly change between settings at a touch of a button.

# XL SERIES

## FPS Gaming

The XL Series is co-developed with prominent Counter-Strike legends that brought together fundamental gaming insights from first-person shooter games. This ingenious collaboration resulted in the 120Hz XL2420T and XL2420TX, two exciting new gaming monitors that are packed with exclusive new features such as the S Switch, Black eQualizer, FPS Mode and Game Mode Loader. Take advantage of the super fast response rate and razor-sharp clarity and don't let hardware shortcomings compromise your winning chances.

### FPS Mode

The preset FPS Mode tailored by Counter-Strike Legends gives you the optimal brightness, contrast, sharpness and color tint you need to spot and track your opponents' every move, even in indistinct situations. This year, there are two variations to this special mode: the FPS1 Mode is designed for Counter-Strike 1.6 and the FPS2 Mode for Counter-Strike Source. The perfect combination of form and function provides gamers with the vantage point to always be one step ahead of the game.

### 120Hz

With a refresh rate of 120Hz, there's never a lag between what's happening in the game. Every in-game details will be smoothly rendered. Spot your opponents the instant they make a move and closely track their every action. Drawing on hyper-speed video processing technology, the XL Series gives you on-screen action and captivating realism.

### NVIDIA® 3D Vision™ 2

The XL Series is certified as NVIDIA® 3D Vision™ 2-ready with the new NVIDIA 3D LightBoost™ technology to provide you with brighter and clearer 3D images. Now you can experience gaming and entertainment like never before with total realism and intensive 3D graphic display.

### Game Mode Loader

The secret is out. Download special gaming presets used by Counter-Strike Legends to see what the pros see. Each mode is fine-tuned so you can leverage these exclusive presets used by pro gamers to your own advantage. They can also be saved onto your S Switch for quick access and game play. More presets from legendary gamers will be released in the future so you can always stay on top of your game.

### S Switch

The XL Series comes with a stylish S Switch. On this unique remote controller, you're able to customize and save your display settings for gaming and entertainment purposes. Use the scroll button on the S Switch to quickly navigate and change your OSD settings. Now, switching seamlessly between the presets is as easy as 1-2-3.

# RL SERIES

## RTS Gaming

The RL Series is created in collaboration with StarTale, a world-leading StarCraft II team, to give you an unprecedented level of control in real-time strategy games. The RL2450HT carries the BenQ signature gaming features: Black eQualizer, Display Mode and Smart Scaling. The RL2450HT offers an additional custom height adjustment stand for gamers that seek extra viewing flexibility. Now, you can have a professional gaming monitor specifically designed for your RTS game play.

### RTS Mode

The preset RTS Mode fine-tunes your monitor image display settings such as brightness, contrast and color tint accordingly for RTS gaming. See your enemies more visibly among the distractions and darkened areas. Get the competitive edge you need with optimized color and contrast exposures.

# GL SERIES

## Console Gaming

The GL Series is designed especially for console gaming which includes the latest HDMI high-speed multimedia interface\* which makes these monitors incredibly convenient to use - Now you can enjoy digital entertainment effortlessly even with additional multimedia equipment in the future. The GL2450HM includes features such as Power Saving, Super Fast 2ms Response Time and Integrated Speakers.

\*Specifications may vary by model. Please refer to the specification sheet for more details.
