

IL420 | Interactive Flat Panel

Highlights

Interactive displays have become one of the most powerful office tools today, replacing traditional meetings and trainings with a new style of business communication that's proven to enhance meeting efficiency, training effectiveness, collaborative discussion, and team building. A winning solution for your business, the BenQ Interactive Flat Panel IL420 combines the power of infrared touch panel and multimedia connectivity to maximize your presentations. Designed with safety and flexibility in mind, the IL420 is easy and simple to install in any office setting using a VESA wall mount.

Infrared 6 Points Touch Technology

Pair the IL420 with Windows® 8 / Windows® 7 and watch the infrared touch technology work its magic turning the displayed image or spreadsheet figure into a multi-touch screen. Trainer or speaker can invite audiences to come up to the board for a quick contest and trial.

Ambient Light Sensor

The IL420 is built with an ambient light sensor to detect the amount of ambient lighting in its surrounding and adjust the display setting accordingly without user intervention. This means the audience can always enjoy optimal picture quality in office and classroom.

Integrated Speaker

To help professional elites gain the competitive edge by enriching their meeting with multimedia resources, BenQ has built 12W speakers into the IL420. The use of videos, music and sound effects make every presentation more engaging and effective.
